ACCOUNTINGQNA GUIDE

QuickBooks Enterprise Advanced Pricing Support

ADVANCED PRICING / PRINTABLE WORKBOOK

Purpose and expected outcome

Build and test Advanced Pricing rules with clear customer, item, quantity, date, and priority conditions before applying them to live sales transactions.

SAFE START

Preserve the starting state, confirm a verified backup, define the expected result, and change only one controlled variable at a time.

Readiness checklist

- ✓ Owner and approver identified
- ✓ Company file and environment confirmed
- ✓ Expected result written down
- ✓ Maintenance window approved
- ✓ Exact symptom and timestamp saved
- ✓ Verified backup or restore point ready
- ✓ Rollback path agreed
- ✓ Accounting reviewer identified

Controlled diagnostic workflow

Record evidence after every step. Stop when the cause is proven and verify before broader changes.

STEP 1 **Define the pricing objective**

Evidence: _____

Decision: Continue / Stop / Escalate / Resolved

STEP 2 **Document conditions**

Evidence: _____

Decision: Continue / Stop / Escalate / Resolved

STEP 3 **Review rule priority**

Evidence: _____

Decision: Continue / Stop / Escalate / Resolved

STEP 4 **Test representative sales**

Evidence: _____

Decision: Continue / Stop / Escalate / Resolved

STEP 5 **Check user permissions**

Evidence: _____

Decision: Continue / Stop / Escalate / Resolved

STEP 6 **Monitor price outcomes**

Evidence: _____

Decision: Continue / Stop / Escalate / Resolved

Decision matrix

OBSERVED CONDITION	ROUTE / NEXT DECISION
One user only	Compare role, profile and workstation.
All users affected	Check host, services, file path and network.
Accounting totals changed	Stop and involve the accountant or controller.
License or account blocked	Use official QuickBooks support.
Issue returns	Review logs, scheduled tasks and integrations.

Risk controls and closure record

- Verified backup exists before material change
- One variable changes at a time
- Least-privilege access is preserved
- Security controls are not disabled broadly
- Only protected copies are repaired or converted
- Accounting-impact changes receive review
- Related reports and users are retested
- Final state, owner and follow-up are recorded

ESCALATION

Prepare a complete handoff package

Include the edition and release, file path, environment, affected users, exact error, timestamp, safe screenshots, backup status, completed tests, expected result, observed result, and business impact. Never include passwords or MFA codes.

Validation and closure

VALIDATION ITEM	RESULT / EVIDENCE
Original workflow repeated	
Source record or control report compared	
Related users and integrations tested	
No duplicate or missing data introduced	
Backup and scheduled jobs confirmed	
Remaining risk and owner recorded	
Follow-up date	
Approved by / closure date
